-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Response to Amendment

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

5

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

10

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

15

Claims 1-9, 11-20, 22-30, and 32-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

20

Independent claims 1, 22 and 34 disclose, "a reservation facility for reserving resources for reading data from the disk and writing data to the disk to support a predetermined Quality-of-Service constraint with respect to data transmitted through the computer network," and independent claims 11 and 33 disclose, "finding at least one disk drive out of the plurality of disk drives that can service the new access request while supporting the Quality-of-Service constraint for the new and existing access requests." Since a QoS constraint is used to reserve resources within a network

25

connection, it is unclear from the claim language how reserving resources in a disk drive

will support the QoS constraint (new or existing)? There seems to be something missing from the claims that would enable a link between the QoS and reserving of a resource in a disk drive. For example, is there some sort of communication that happens between the network resources and the disk drive to enable the drive to reserve the resources? If

5 so, what is it? If there is no such communication, how does the disk know what to reserve? The claims need to specify how the reserving of resources in a disk drive supports a QoS constraint more clearly.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

10 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 11-20, 22-30, and 32-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the
15 subject matter which applicant regards as the invention.

All claims make mention of "reserving resources" either as a step or through the use of a "reservation facility." However, figure 2, elements 18A-18E and figure 7, element 80 all act as reservation facilities. It is unclear which reservation facility or facilities from the figures the claims are referring to.
